“Zone VE” is the special flood hazard area that corresponds to the one hundred-year coastal floodplains extending from offshore to the inland limit of a primary frontal dune along an open coast and any other area subject to high velocity wave action from storms or seismic sources. It is an area subject to high velocity waters, including coastal and tidal inundation or tsunamis. Whole-foot base flood elevations derived from the detailed hydraulic analyses have been determined at selected intervals within this zone.

“Zone X (shaded)” are areas of moderate flood hazard corresponding to areas of the five-hundred-year floodplain, areas of one-hundred-year flooding where average depths are less than one foot, areas of one-hundred-year flooding where the contributing drainage area is less than one square mile, and areas protected from the one-hundred-year flood by levees.

“Zone X (unshaded)” are areas of minimal flood hazard corresponding to areas outside of the five-hundred-year floodplain. Base flood elevations or depths have not been determined for Zone X.

- (a) Any repair, reconstruction, improvement, or addition to a nonconforming structure, if it is considered to be substantial improvement, shall comply with the applicable standards of this chapter.
- (b) All relocated structures shall comply with the applicable standards of this chapter.
- (c) Substantial improvement of a damaged, destroyed, or demolished structure located in a floodway shall not be allowed unless a variance from the flood requirements is obtained.

(1993, ord 93-78, sec 3; am 2001, ord 01-108, sec 1.)

**Section 27-16. Duties and responsibilities of the floodplain administrator.**

The floodplain administrator, with the cooperation and assistance of other County departments, shall administer this chapter. The duties and responsibilities of the floodplain administrator shall include, but not be limited to:

- (1) Permit review.
  - (A) All building permits, certificates of occupancy, grading permits, and development or subdivision proposals shall be reviewed to determine whether the requirements of this chapter have been satisfied;
  - (B) All other development permits referred by other governmental departments and agencies shall be reviewed for consistency with the requirements of this chapter;
  - (C) All permits and proposals shall be reviewed to determine that the proposed building site is reasonably safe from flooding;
  - (D) For proposed building sites in flood-prone areas where special flood hazard areas have not been defined, water surface elevations have not been provided, and there is insufficient data to identify the floodway or coastal high hazard areas but the floodplain administrator has determined that there are verifiable physical indications that such hazards are present, all new construction, improvements to repetitive loss structures and substantial improvements (including the placement of manufactured homes) shall be:
    - (i) Designed and adequately anchored to prevent flotation, collapse, or lateral movement;
    - (ii) Constructed of flood-resistant materials;
    - (iii) Constructed using methods and practices that minimize flood damage;
    - (iv) Constructed with electrical, heating, ventilation, plumbing, and air conditioning equipment and other service facilities that are designed and/or located so as to prevent water from entering or accumulating within the components during conditions of flooding;
    - (v) Reviewed to assure that all necessary permits have been received from those governmental agencies from which approval is required by Federal or State law, including section 404 of the Federal Water Pollution Control Act Amendments of 1972, 33 U.S.C. 1334; and
    - (vi) With respect to new and replacement utilities, compliant with the requirements of section 27-19; and
  - (E) All permits shall be reviewed to determine that the proposed development when combined with all other existing and anticipated development will not increase the water surface elevation of the base flood at any point.
- (2) Information maintenance.

The floodplain administrator shall maintain the following:

  - (A) The Flood Insurance Study and Flood Insurance Rate Maps for the County of Hawaii;

- (B) The certification of lowest floor elevation;
  - (C) The certification of floodproofing for spaces below the base flood elevation;
  - (D) The certification of final pad elevation where a site is filled above the base flood elevation;
  - (E) The certification that an encroachment in the floodway will not result in any increase in flood levels during base flood discharge; and
  - (F) The certification of elevation and structural support for structures in the coastal high hazard area.
- (3) Notification of actions that may alter the boundaries of flood hazard areas on Federal Emergency Management Agency Flood Insurance Rate Maps.
- (A) The floodplain administrator shall notify the council of the following actions when they relate to areas located within Hawai'i County:
    - (i) A Federal Emergency Management Agency initiated map study or restudy of flood hazard areas;
    - (ii) A floodplain administrator initiated map revision process, pursuant to part 65 of the National Flood Insurance Program Regulations; and
    - (iii) A floodplain administrator initiated map revision process, pursuant to a Federal Emergency Management Agency Cooperative Technical Partners Initiative.
  - (B) Notification shall consist of a written message from the floodplain administrator to the County council and shall be submitted to the County council as soon as practical, but no later than sixty days after the date the department of the floodplain administrator initiates any of the actions described in paragraph (3)(A) of this section. Notification shall include, but not be limited to:
    - (i) Identification of the stream or general area being studied or revised; and
    - (ii) The name of the entity undertaking the flood mapping study, restudy, or revision process.
- (4) Interpretation of maps.  
The floodplain administrator shall make interpretations where needed, as to the exact location of the boundaries of the areas of special flood hazards (for example, where there appears to be a conflict between a mapped boundary and actual field conditions). A person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in article 5.
- (5) Initiating changes in base flood elevations.  
Whenever base flood elevations increase or decrease or result in a mappable alteration of the boundaries of any special flood hazard area, as a result of physical changes affecting flooding conditions, as soon as practical, but no later than six months after the date such information becomes available, the floodplain administrator shall notify the Federal Emergency Management Agency of the changes by submitting technical or scientific data through the Letter of Map Revision process. Such a submission is necessary so that upon

confirmation of those physical changes affecting flooding conditions, risk premium rates and floodplain management requirements will be based upon current data.

- (6) Using other base flood data.  
When base flood elevation data has not been provided in accordance with section 27-6, the floodplain administrator shall obtain, review, and reasonably utilize any base flood elevation and floodway data available from a Federal or State agency, or other source, in order to administer article 4. Any such information shall be submitted to the floodplain administrator for consideration.
- (7) Whenever a watercourse is to be altered or relocated:
- (A) Require that the flood carrying capacity of the altered or relocated portion of said watercourse is maintained;
  - (B) For riverine situations, notify the State of Hawai'i department of land and natural resources (commission on water resource management) and all adjacent property owners, prior to such alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Emergency Management Agency; and
  - (C) Whenever a proposed alteration or relocation occurs that would significantly change the base flood elevation or result in a mappable alteration of the boundaries of any special flood hazard area, technical and scientific data through the Conditional Letter of Map Revision shall be submitted to and approved by the Federal Emergency Management Agency. Such a submission is necessary so that upon completion of those physical changes affecting flooding conditions, risk premium rates and floodplain management requirements will be based upon current data. Work to be performed under an approved Conditional Letter of Map Revision shall be subject to the following:
    - (i) Work shall not begin on any on-site development affecting or impacting the floodplain until an approved Conditional Letter of Map Revision is received from the Federal Emergency Management Agency; and
    - (ii) Within sixty days of receiving final approval from the floodplain administrator for the completion of the alteration or relocation of a watercourse, the request for a Letter of Map Revision, and all other information required by the Letter of Map Revision process shall be submitted to the Federal Emergency Management Agency.
- (8) Violations.

Take action to remedy violations of this chapter as specified in article 6.
